School of Information Technology
ITEC 2380 – Project Report 2

Background

Review the Final Project Description and Progress Report #1 for information about what I'll be looking for in the Final Project.

Project Report 2

- Refer to your Progress Report #1 to review your website's purpose
- Included any updates to that report in this submission (towards a final cohesive documentation)
- Create Wireframes / Sketches / Storyboards
    - Like blueprints for building a house
    - Will be guides for when you start coding
    - Helps you preserve the brand and set a target
    - You can use diagramming software or sketch your ideas on paper and take pictures
- Choose a color scheme and include relevant color codes
    - http://www.colorsontheweb.com/colorwizard.asp
    - Can use other color scheme generators
    - Provide a swatch sample of the color codes you want to use
- Create a Homepage for your website with a menu to the different pages in your site
    - Flowcharts, nested lists, organization chart, etc
- Publish your Homepage to WebDav
- Submit your documentation/WebDav link to D2L Assignment dropbox
- Start generating the content that you will want to use and strategize for your upcoming coding phase. The more research done now will help you coding phase go smoother.
